ANTI-MICROBIAL

ANTI-BACTERIAL

HMF
FILTERS

by the

**FIHPR**

What is

HMF?

HMF stands for

Hemp Micro-Fibers

What other uses are there for hemp micro-fibers?

- Clothing
- Sailing
- Sponges
- Paper
- Much more!

Why Hemp?

The reason that we decided to use hemp fibers in the filters is because they kill 95% of bacteria and microbes on contact. Most of the common pitcher and faucet filters available do not have this capability and so leave you susceptible to contamination.

Where can I find a HMF Filter?

For the time being, HMF Water Filters are being sold online around the world.

www.FIHPR.org

Is Hemp Legal?

Hemp is legal to trade, but it is only legal to cultivate with academic participation and federal licensing. The approved pilot programs are taking place all over the USA.

Did you know?

In 2015, the US imported over \$800million in hemp products

Florida has the ideal climate allowing for 3-4 harvests/yr

During WWII, US troops got help from "Hemp for Victory"

George Washington dabbled in growing industrial hemp

Henry Ford used hemp to build and fuel the 1st Model-T

In 1938, Popular Mechanics magazine called hemp the billion dollar crop
